---

[a] 28 days of observation.

[b] The barometric readings for July 15, 2 p. m. and 16, 6 a. m. were taken from a self-registering apparatus.

VIRAC.

[$\phi = 13° 35'$ N; $\lambda = 124° 14'$ E; barometer above sea, 7 meters; gravity correction not applied, —1.76 mm.]

---

[a] Beginning with the afternoon of May 13, the height of the barometer above sea level was 9.5 meters.
[b] The thermometer shelter and raingauge were blown down during a typhoon in the afternoon of the 9th.
[c] 29 days of observation.

LAOAG.

[ϕ=18° 12′ N; λ=120° 35′ E; barometer above sea, 9.5 meters; gravity correction not applied, —1.58 mm.]

---

[a] Owing to some unavoidable defects in the recording instrument, the velocity of the wind had to be omitted occasionally for a few days in several months and in several of the stations included in these summaries.

[b] 30 days of observation.

[c] No observation was made of wind direction on January 3, and on the 4th, 2 a. m. and 6 a. m.

[d] 26 days of observation.

[e] 20 days of observation.

[f] No observation was made of wind direction on May 2 to 11, and on the 12th, 2 a. m., 6 a. m., and 10 a. m.

[g] 27 days of observation.

[h] 22 days of observation.

[i] 28 days of observation.

[j] 24 days of observation.

[k] No observation was made of wind direction on November 27, 2 p. m., 6 p. m., and 10 p. m., and on the 28th, 2 a. m.

INTRODUCTION.

The Antipolo Magnetic Observatory, which is a division or branch of the Weather Bureau, Manila Observatory, was located at Manila in the Observatory grounds until 1904. It was temporarily closed on account of the electric car system established in that city. The new location of the observatory lies due east of the old at a distance of 18.5 kilometers. The coördinates of the variation building are 121° 10′ E and 14° 36′ N, its elevation above the sea level about 215 meters.

A description of the buildings, instruments, and method both of observation and of reduction, will be found in the "Annual Report of the Weather Bureau for the year 1911, Part IV." The arrangement of the magnetic values in this publication is the same as that of 1911; we adopted the distribution given by the Coast and Geodetic Survey of the United States of America to similar publications of its magnetic observatories.

For all the observations the Insular standard time of the Philippine Archipelago, eight hours (8^h) or the 120th meridian east of Greenwich, is used.

Diurnal variation of D.

1913.

[Five international quiet days. Time 8^h E of Greenwich; 24^h or 0^h=midnight.]

WORK OF THE BUREAU DURING THE CALENDAR YEAR 1914.

WORK OF THE WEATHER BUREAU DURING THE CALENDAR YEAR 1914.

I. MANILA CENTRAL OBSERVATORY.

1. WORK OF THE CENTRAL OBSERVATORY.

(*a*) **Meteorological department.**—The routine work of this department has been maintained throughout the year as hithertofore.

The Bureau has been unable to expand and extend its work owing to the strict economy that had to be practiced, but at the same time much was done in the study of the climatological conditions of the Islands in so far as these conditions affect the agricultural prosperity of the country. For this object an elaborate monograph was published by Rev. Miguel Saderra, the Assistant Director, on the Annual Amount and Distribution of the Rainfall in the Archipelago. And in order to call attention to the climate of the Islands, a pamphlet was prepared on the subject by the Director for the Philippine Board of the Panama Exposition for distribution during the Exposition at San Francisco.

The Rev. Antonio Galan, S. J., a volunteer assistant in the Observatory, published during this year a mathematical study of the Diurnal Variation of the Atmospheric Pressure in Manila.

The year 1914 was one of comparative freedom from typhoons in the Islands, and, with the exception of the Samar and Luzon typhoon in June and the Manila flood of September, very little damage was done by storms. The Rev. Jose Coronas, chief of the meteorological department, published two reprints from the Monthly Bulletins, one on the June typhoon and the other on the typhoons and floods of September.

The number of typhoon warnings sent to foreign observatories during the year was 127. The number of barometers compared and corrected was 156.

From April 1 to June 15, 1914, advantage was taken of the privilege of reducing the office hours from seven to five per day, though the observers were kept on duty each day as usual from 6 a. m. to 7 p. m. The overtime given by the employees during the year was 1,836 hours and 24 minutes.

(*b*) **Seismic department.**—During the year, 146 earthquakes were felt in the Philippines. Of this number 127 were of intensity II–IV according to the Rossi-Forel scale, and 19 of intensity V–VII. Happily, there was not a single one violent enough to cause damage and destruction to buildings and property. The regions of the Archipelago that have reported the greatest number, but not the most violent earthquakes, were northern Luzon and northeastern Mindanao.

The microseismographs registered 329 perturbations during 1914. Of this number 218 corresponded to earthquakes that had occurred in the different parts of the Philippines and within a radius of 1,000 kilometers around Manila; the rest, 111, were due to distant earthquakes. Some of these records are worth special mention, viz, those due to the earthquakes in Java, Sumatra, Peru, Chili, Mexico, Turkey, and Kagoshima (Japan), which last coincided with the eruption of the volcano in the neighboring Island of Sakura-Jima. Most of the distant earthquakes were submarine, which took place principally in the Pacific close to New Guinea, the Salomon Islands, and to the north close to the Aleutian and Kurile Islands.

The station at Ambulong, Taal.—This station which was founded by authority of the Legislative Assembly of 1912, for the special object of facilitating the study of the Taal Volcano, so as to prevent as far as possible a repetition of the loss of life occasioned by the eruption of 1911, has continued its services as hithertofore.

The number of parties carried by the launch to visit the volcano was 25, representing a total number of 91 persons.

New station in Guam.—For a long time past it had been our desire to have on the Island of Guam the installation of a seismograph, for, owing to its position near the famous Challenger Deep, the island was very interesting from a seismic point of view, and several seismologists of the International Seismic Station of Strassburg had written to Manila Observatory on the same subject. It was not, however, easy to realize the project without burdening the Weather Bureau with a good deal of expense in salaries and material. Fortunately the United States Navy came to our help. With the permission of the Secretary of the Navy, the authorities of the naval station at Guam offered to place at the disposal of the Weather Bureau the housing facilities and the personnel necessary for the care of the seismograph, provided this Bureau would lend the instrument and see to its installation. The reason for this offer was that the naval authorities were anxious to learn more concerning the seismic condition of the island in view of the construction of the fortifications to be erected there. The offer was accepted with gratitude and with the permission of the Honorable the Governor-General the Rev. Miguel Saderra Maso, Assistant Director of the Weather Bureau, was sent to Guam for this object. Father Saderra left Manila August 8 on board U. S. S. *Supply,* installed the instrument in the Government House, and instructed a marine in the care of the apparatus and returned to Manila on September 5, 1914.

Special publications.—Father Saderra, in collaboration with Dr. W. Smith of the division of mines, published in the Philippine Journal of Science a study on "The relation of seismic disturbances in the Philippines to Geological Structure." He also published in the Bulletin of the Weather Bureau a special study on the character of the Baguio earthquakes and their probable cause.

(*c*) **Magnetic department.**—During the year 1914 the routine work of the Observatory has gone on as usual. In July there arrived from Washington, D. C., the corrections and instrumental errors of our apparatus as calculated by the department of magnetism of Carnegie Institution, and with these we began the measurement of the photographic curves of the past three years so as to reduce their measure to absolute values and prepare them for publication.

As usual, the quarterly report of magnetic calm and stormy days was sent regularly to the chief of the magnetic service of De Bilt, Holland, to be included in the Bulletin of Magnetism published by the Permanent International Commission of Terrestrial Magnetism. Photographic copies of the traces of the greater magnetic storms were also forwarded to the same commission.

Special observations were made during several partial eclipses of the sun, and during the total eclipse in August the Observatory took part in the simultaneous international observations which were made every five minutes for two hours before and after, and every minute during the hour at which the eclipse took place.

(*d*) **Astronomical department.**—During the year 1914, 940 transits of stars were observed and 33 chronometers rated.

Much time was occupied in the determination of the constants of a new transit instrument. Every week observation of stars near the pole were made for azimuth and colimation; 35 observations of circumpolar stars (α and δ Ursae minoris and 51 H Cephei) were made for the determination of the equatorial distances of the side wires of the micrometer with reference with the meridian wire, the following values with their probable errors being obtained:

$+37^{s}.028 \pm 0^{s}.0122$.	$-37^{s}.351 \pm 0^{s}.0110$.
$+34^{s}.144 \pm 0^{s}.0105$.	$-34^{s}.310 \pm 0^{s}.0118$.
$+31^{s}.257 \pm 0^{s}.0124$.	$-31^{s}.267 \pm 0^{s}.0122$.
$+25^{s}.011 \pm 0^{s}.0104$.	$-25^{s}.194 \pm 0^{s}.0122$.
$+21^{s}.989 \pm 0^{s}.0100$.	$-22^{s}.252 \pm 0^{s}.0106$.

Eighty observations of α and λ Ursae Minoris were made for the determination of the value in time of one revolution of the micrometer screw, which gave a value of $5^{s}.924$ with a probable error of $0^{s}.0052$.

Forty determinations of the value in arc of one division of the level gave $1''.378 \pm 0''.0043$.

At the beginning of August, 1913, the time ball was connected with the chronograph of the Observatory in order that the errors in the time of fall could be determined. During the present year the greatest errors of the time of fall were—

$0^{s}.54$	February 11.
$0^{s}.37$	July 7.
$0^{s}.30$	July 13, 18.
$0^{s}.33$	August 17.
$0^{s}.33$	September 15.

At the end of January and the beginning of February, 1914, a series of observations and drawings were made of the planet Mars, at the suggestion of Professor Pickering of Harvard. In his letter acknowledging the receipt of the drawings the Professor says: "They are the only colored drawings that I have received and are specially interesting on that account for comparison with my own."

The observations on solar radiation were made as usual on all days on which the sky was clear by means of the Angstrom compensating pyrheliometer; 730 observations were made during the year. Since October, 1913, records were obtained every day with the Calendar's sunshine receiver and electrical recorded of which we shall speak later.

2. IMPROVEMENTS AND NEW APPARATUS.

(*a*) The only change that has been made in the Central Observatory was the translation of the large Wiechert seismograph from the kiosk in the garden to a room in the interior of the astronomical building. This was necessary because the changes of temperature in the kiosk affected adversely the records of the instrument; in the astronomical building this is avoided, and since the change the apparatus has worked satisfactorily.

(*b*) Two 180-kilogram Wiechert seismographs were acquired during the year. One of these is now working in Guam, and the other is being observed in the Central Observatory with the view of installing it in some station of the Visayas or Mindanao for the better study of the frequent seismic movements which have their origin in the "Great Philippine Deep" discovered by the "Planet."

In the mechanics' shop a simple seismograph has been constructed. It is of the general Omori type, but greatly modified in order that it might take up but little space and be installed on the ground floor of houses of even light material.

(*c*) In June, 1914, new magnets for the declination, horizontal component, and inclination were obtained from England; the declination magnets and the inclination needles have given fair results; the magnets for the horizontal component have not had their constants determined as yet, but it is hoped that they will give good values. With these new parts the Observatory is now provided with a double set of magnets for each of the instruments and hence will not be obliged to interrupt its series of observations in case of accident to a magnet.

(*d*) One small improvement to the observatory in Antipolo carried out at the beginning of 1914 was the lining of the variation chamber with vulcanite roofing material in order to diminish as much as possible the changes of temperature, which up to that time had affected the photographic records.

(*e*) For the improvement of the time service, a new transit instrument was received toward the end of 1913 from the well-known firm of Repsold & Söhne of Hamburg and was installed in the place of the old Dollond instrument. The objective of the new transit is 7.5 cc. and its focal length about 80 cc.; the micrometer is provided with eleven fixed and three moveable wires.

(*f*) A Calendar's sunshine receiver and electrical recorder supplied by the Cambriedge Scientific Instrument Company was installed on the observatory tower toward the end of 1913, and during the year 1914 has given good results. It is a very delicate and complicated instrument which gives a continuous record of the vertical component of the radiation of the sky. The action of the instrument may be described as follows: "A small current from two storage sells connected up in series passes through both resistances of the receiver. If the temperatures of both wires are the same, the receiver is so constructed that the resistances are equal; but by a well-known law, if the temperature of one wire exceeds that of the other, the electrical resistance of the former exceeds that of the latter, and the differences of temperature and resistance between the wires are connected by a relation which is almost exactly linear. Consequently, a record of the difference between the resistances is also the record of the difference between the temperatures of the wires; and it is also a measure of the radiation from the sky as received on a horizontal surface, since the temperature of the black wire is reaised above that of the bright wire by an amount depending on the radiation falling on the plate." (Meteorological Office, Geophysical Memoirs No. 4, by R. Corless.)

Both the Repsold transit instrument (₱3,481) and the Calendar's sunshine receiver and electrical recorder (₱750) were purchased with the private funds of the Observatory staff.

II. SECONDARY STATIONS.

1. CHANGES IN STATIONS.

There has been but little change in the secondary stations of the Bureau during the year. In December, 1913, a new station was founded at Puerto Princesa, Palawan, and by the beginning of the year 1914 was in complete working order. One station was closed, viz, that at Silang, Cavite, and arrangements were made for the opening of a new one at Glan, southern Mindanao, where it is thought good work may be done as an agricultural colony is to be opened in the vicinity in the near future.

2. STATIONS OF THE WEATHER BUREAU.

Hence, at the end of 1914 the Weather Bureau was maintaining the following stations:

One branch observatory at Baguio, 1 magnetic observatory at Antipolo, 1 seismic and geophysic station at Ambulong, 7 first-class stations, 10 second-class, 25 third-class, and 10 rain stations.

III. PERSONNEL.

1. **Nationality.**—The composition of the personnel of the Weather Bureau as to nationality has remained practically unchanged, over 91 per cent being Filipinos.

2. **Separation.**—There were 8 separations from the service during the year and 8 appointments. Of the separations, 1 was caused by death, 2 dismissals owing to unsatisfactory work, and 5 resignations.

3. **Promotions.**—There were 20 promotions in all, those obtaining the promotions being all among the Filipino employees of the Bureau. Some of those who received a well-merited promotion have been in the service of the Weather Bureau or the old Spanish Oficina Meteorologica for more than thirty years.

PART II.

HOURLY METEOROLOGICAL OBSERVATIONS MADE AT THE CENTRAL OBSERVATORY DURING THE CALENDAR YEAR 1914.

INTRODUCTION.

Part II of our report for 1914 contains the meteorological observations made during the year at the Central Observatory at Manila. The hours of observations are given in Insular standard time—that is, in the time of the one hundred and twentieth meridian east of Greenwich, adopted by order of the United States Government on September 6, 1899. It is to be noted that the observations of atmospheric pressure, temperature, relative humidity, vapor tension, and the direction and force of the wind are hourly, read directly between the hours 6 a. m. and 7 p. m., while for the hours from 8 p. m. to 5 a. m. they are taken from self-registering apparatus. The hourly observations of the direction, form, and amount of clouds are made from 8 a. m. until 5 p. m. only.

Each of the tables of hourly observations shows also the respective hourly, daily, and monthly means. The extreme daily values of the various elements, together with the time of their occurrence, are united into a separate table. The thermometer and atmidometer are placed in the observatory park, 1.5 meters above the ground.

The readings of the barometer have not been corrected for gravity; this correction would be —1.72 mm.

All oboservations contained in this report are expressed in the metric system, continuing the practice adopted at the time of the reorganization of the Weather Bureau. As in former reports, we have arranged the observations according to month.

EXPLANATION OF SYMBOLS (BEAUFORT'S LETTERS AND INTERNATIONAL WEATHER SYMBOLS).

Symbol.	Equal to—	Symbol.	Equal to—
Ci.	Cirrus.	o	Overcast.
Ci.-S.	Cirro-stratus.	p	Passing showers of rain.
Ci.-Cu.	Cirro-cumulus.	q	Squally.
A.-Cu.	Alto-cumulus.	u	Ugly or threatening weather.
A.-S.	Alto-stratus.	v	Visibility of distant objects.
S.-Cu.	Strato-cumulus.	w	Wet or heavy dew.
N.	Nimbus.	●	Rain.
Cu.	Cumulus.	≡	Fog or mist.
Cu.-N.	Cumulo-nimbus.	⌓	Dew.
S.	Stratus.	⊕	Solar corona.
Fr.-Cu.	Fracto-cumulus.	○	Solar halo.
Fr.-N.	Fracto-nimbus.	◒	Lunar corona.
Fr.-S.	Fracto-stratus.	◡	Lunar halo.
S.-cf.	Stratus-cumuliformis.	↯	Lightning.
N.-cf.	Nimbus-cumuliformis.	⛈	Thunderstorm.
M.-Cu.	Mammato-cumulus.	T	Thunder.
b	Clear, blue sky.	↙	Strong wind.
c	Partial clouds.	⌒	Rainbow.
d	Drizzling or light rain.	∞	Dust haze.
g	Gloomy, or dark, stormy-looking weather.		

NOTE.—The intensity of any individual phenomenon may be distinguished by the figures $^{\circ}$ and ^{2}, which should be used as exponents of the symbols, so that $^{\circ}$ indicates slight, and ^{2} strong; e. g., ●$^{\circ}$=slight rain, ●^{2}=heavy rain. Figures in heavier type represent extreme values.

DAILY GENERAL REMARKS.

1----Cloudy weather.
2----Overcast.
3----As yesterday.
4----d° in the morning; d in the afternoon.
5----Gusty ESE winds in the forenoon; coloration of upper clouds at sunset.
6----Coloration of upper clouds at sunset.
7----d° in the afternoon.
8----Slight coloration of upper clouds at sunrise; ≡° in the morning.
9----Coloration of upper clouds at sunset.
10----Overcast.
11----d° 7.23 a. m.
12----Overcast.
13----●° in the afternoon.
14----⌒°, ● in the morning; d° in the afternoon.
15----Cloudy weather.
16----Somewhat gusty SE winds in the afternoon.
17----Cloudy weather.
18----Somewhat gusty SEly winds in the afternoon.
19----As yesterday.
20----Somewhat gusty SEly winds in the forenoon and afternoon.
21----Cloudy weather.
22----Somewhat gusty SEly winds in the forenoon.
23----Fair weather.
24----≡° in the morning.
25----Fair weather.
26----d in the forenoon and afternoon.
27----Cloudy weather.
28----As yesterday.

DAILY GENERAL REMARKS.

1----Cloudy weather.
2----d° 7.15 a. m.
3----⌂° early in the morning.
4----Fair weather.
5----Gusty SEly winds in the afternoon.
6----Cloudy weather.
7----Somewhat gusty SEly winds in the afternoon.
8----Gusty SEly winds in the afternoon.
9----≡° in the morning.
10----Gusty SE winds in the afternoon.
11----Do.
12----Fair weather.
13----As yesterday.
14----Cloudy weather.
15----● in the afternoon.
16----Slight coloration of clouds at sunset.
17----Cloudy weather.
18----Gusty SEly winds in the afternoon; slight coloration of upper clouds at sunset.
19----p° 3.05 p. m.; convergence of Ci. toward NW in the evening.
20----⊕ in the afternoon; coloration of clouds at sunset.
21----Cloudy weather.
22----○°, gusty ESE winds in the afternoon.
23----Fair weather.
24----Gusty SEly winds in the afternoon.
25----Somewhat gusty SEly winds in the afternoon.
26----Fair weather.
27----≡° in the morning.
28----Somewhat gusty SE winds in the afternoon.
29----○, gusty SE winds in the afternoon.
30----Fair weather.
31----As yesterday.

DAILY GENERAL REMARKS.

1----Gusty SE winds in the afternoon.
2----Somewhat gusty SE winds in the forenoon and afternoon.
3----Coloration of upper clouds at sunset.
4----☈° NE quadrant, ● in the afternoon; ⚡ W, WSW, in the evening.
5----Heavy thundershowers came from E, with some hail and gusts of 23 m. p. s. from WNW at noon; coloration of upper clouds at sunset.
6----d° 10.53 a. m., and 4.35 p. m.; ⊤ N, S quadrant in the afternoon; ⚡ NNW in the evening.
7----Cloudy weather.
8----● in the afternoon.
9----●° early in the morning; d° 12.15 p. m.
10----Overcast.
11----Fair weather.
12----Cloudy weather.
13----Coloration of clouds at sunset; ☈° ENE, S in the evening.
14----⚡ SE in the evening.
15----● early in the morning; ⊤ E, S, convergence of Ci. toward S in the afternoon.
16----Fair weather.
17----Cloudy weather.
18----⊕ in the afternoon; ⚡° S in the evening.
19----Cloudy weather.
20----●° in the afternoon.
21----Cloudy weather.
22----p° 1.53 p. m.; coloration of clouds at sunset; ● in the evening.
23----d early in the morning; coloration of clouds at sunrise.
24----Somewhat gusty SEly winds, ⊤° NNE in the afternoon; ⚡ NNW in the evening.
25----Cloudy weather.
26----Gusty SEly winds in the afternoon.
27----Coloration of upper clouds at sunset.
28----Convergence of Ci. toward E, somewhat gusty SE winds in the afternoon; ⚡ WSW, NW in the evening.
29----⌓ in the evening.
30----Gusty SE winds in the afternoon.

DAILY GENERAL REMARKS.

1----Gusty SE winds in the afternoon.
2----Cloudy weather.
3----As yesterday.
4----Coloration of clouds at sunset; ⚡ NNW in the evening.
5----⚡ SE, W in the evening.
6----⚡ NNW in the evening.
7----⚡ NNW in the evening.
8----⊤ NE, ⊤° NW, ●° in the afternoon; coloration of clouds at sunset: ⚡° NW, NNW in the evening.
9----Cloudy weather.
10----Coloration of clouds at sunrise; ○, [⚡ various points, ⊤² NW in the afternoon; ⚡ NNW, NNE, ●° in the evening.
11----○ in the morning; ⊤ NNE, S quadrant, d in the afternoon; ⚡ NW quadrant in the evening; ● at night.
12----Somewhat gusty SEly winds in the afternoon.
13----Cloudy weather.
14----Gusty SE winds in the afternoon.
15----Cloudy weather.
16----○ in the afternoon.
17----Fair weather.
18----Heavy thundershowers in the evening.
19----Coloration of clouds at sunrise; ⊤ S, d in the afternoon.
20----d in the early morning and evening; [⚡° S, NNE, SE in the afternoon; ⚡ SSE in the evening.
21----[⚡° N quadrant in the forenoon; ⊤° E, ⊤² N, ● in the afternoon.
22----⚡ SW, W, NNW in the evening.
23----Coloration of clouds at sunrise.
24----⊤ E, ⌒ in the afternoon; ● in the afternoon and at night.
25----Slight convergence of Ci. and coloration of clouds at sunrise; ⌒° in the afternoon; ⚡ S in the evening.
26----[⚡ E, N, NW, ⌒², ● in the afternoon.
27----⊕ in the morning and afternoon; [⚡ NE quadrant, ⌒ in the afternoon; ⚡ various points in the evening.
28----⊤ various points in the afternoon; [⚡ N in the evening; ● at night.
29----[⚡ E, [⚡° NW quadrant, d° in the afternoon; ⚡° SSE in the evening.
30----●° 4.35 p. m.
31----● in the early morning and afternoon.

DAILY GENERAL REMARKS.

1----Gusty SWly winds at intervals with ● in the morning, afternoon and night.
2----Rainy and somewhat squally weather.
3----As yesterday.
4----d early in the morning and in the evening, ↯ ENE in the evening.
5----Coloration of clouds at sunrise; ⊕ in the morning.
6----Convergence of Ci. toward N, ○ in the morning; ᗜ in the evening.
7----○ in the afternoon; ᗜ in the evening.
8----Coloration of clouds at sunrise; ○ in the forenoon; [↯² SE quadrant, ⊤ N quadrant, ● in the evening.
9----↯ NNW in the evening.
10----Cloudy weather.
11----⌒, [↯° ENE in the afternoon.
12----Coloration of clouds at sunrise; ↯ N in the evening.
13----ᗜ early in the morning; coloration of clouds at sunrise; [↯ E, ⊤ various points in the afternoon.
14----○² in the morning; ○°, [↯° ENE, ●° in the afternoon.
15----⌒ 5.30 p. m.; ↯ N in the evening.
16----○ in the morning, d°, ⊤ SE quadrant in the afternoon; ↯ NW quadrant in the evening.
17----↯ SW in the evening.
18----○ in the morning; ⊕, d° in the afternoon; ● at night.
19----Rainy and squally weather.
20----● in the morning and d in the afternoon.
21----d° in the afternoon.
22----↯ E, SW in the evening.
23----Slight coloration of clouds at sunrise; ○² in the morning.
24----Coloration of upper clouds at sunrise; ○ in the morning and afternoon; [↯ N quadrant; ●° in the afternoon.
25----○° in the morning; ○, p, [↯ NNW in the afternoon; coloration of clouds at sunset.
26----○° in the forenoon; ⊤ E 3.20 p. m.
27----●² in the early morning; ≡° in the morning; ○ in the afternoon; coloration of clouds at sunset; ↯ N in the evening.
28----Somewhat gusty WNW winds in the morning backed to SW in the afternoon.
29----● in the morning and at night; gusty SWly winds in the afternoon.
30----d in the early morning with gusty SWly winds.

DAILY GENERAL REMARKS.

1----d in the afternoon; ●² at night.
2----● in the early morning; coloration of clouds at sunrise.
3----○° at noon; some rain in the afternoon and at night.
4----● in the morning; d° in the afternoon.
5----Somewhat rainy and squally weather.
6----As yesterday.
7----Do.
8----● in the morning and evening with gusty SWly winds.
9----Coloration of clouds at sunrise; ●, ○ in the morning; gusty WSW winds in the afternoon.
10----Gusty WSW winds at intervals; ○ in the morning.
11----Gusty WSW winds at intervals; ○ in the forenoon; d°, ⊕ in the afternoon.
12----Gusty WSW winds at intervals with some ●° in the forenoon and evening; ○° in the morning.
13----Gusty WSW winds at intervals; ○² in the morning; [< SE quadrant in the afternoon; [< W in the evening.
14----●² ⊤° NNW in the morning; [< N quadrant, ○ in the afternoon; thundershowers in the evening.
15----● in the morning and afternoon; gusty SWly winds at noon; ⊤ S quadrant in the evening.
16----[< E quadrant in the afternoon; ●² at night.
17----Coloration of clouds at sunrise; ⊤ E, d in the afternoon.
18----d in the morning; ● at night; [< S quadrant in the evening.
19----● in the early morning; ○ in the early morning; [< NE and SE quadrants in the afternoon; ●² in the evening.
20----[< NE quadrant, ● in the afternoon.
21----○° in the morning; [< NE quadrant, WNW, SW, d° in the afternoon.
22----d in the early morning; convergence of Ci. toward E in the morning; ⊤ SSW 12.23 p.
23----● in the early morning and afternoon; coloration of clouds at sunset.
24----● in the morning and at night; gusty SWly winds in the afternoon.
25----p° in the morning; gusty SSW winds in the forenoon and afternoon, ● in the afternoon; thundershowers in the evening.
26----Somewhat rainy and squally weather; ○° in the morning; ⊤ E quadrant at noon; < NW in the evening.
27----[<° NW quadrant in the morning; ● in the morning, afternoon and evening.
28----Overcast.
29----◡, < N in the evening.
30----d°, ○² in the morning; ○, ⊕ in the afternoon.
31----< N quadrant in the evening.

OBSERVATIONS FOR AUGUST, 1914.

DAILY GENERAL REMARKS.

1----☈° NE and ☈ S quadrants in the afternoon; ●° in the evening.
2----⊤° NE quadrant in the afternoon; ☇ N, d at night.
3----⊤ NE 2.10 p.; coloration of clouds at sunset.
4----⌒, ☈ E in the afternoon; coloration of clouds at sunset; ☇ N in the evening.
5----☈° E quadrant in the afternoon, and toward NNW in the evening.
6----☈ E quadrant with occasional ●° in the afternoon.
7----d, ⌒, ⊤ E, NE in the afternoon; ☇$_0$ WSW, W, NNW in the evening.
8----d° in the morning; ☈ S quadrant, ●° in the evening.
9----☈ NE and SE quadrants in the afternoon; ●° at night.
10----● in the early morning; ⊤ E 11.57 a.; ☈° SSE in the afternoon.
11----● in the morning; gusty SW winds in the afternoon and at night.
12----Gusty SWly winds at intervals with some ● in the morning and afternoon.
13----Slight coloration of clouds at sunrise; gusty SWly winds at intervals with d in the early morning and ● at night.
14----● in the evening.
15----d 5.50 a.
16----Cloudy weather.
17----d in the early morning; ☈° NW, ⊤° NNE in the evening; ● at night.
18----☈° ENE in the evening.
19----Gusty SWly winds in the afternoon and at night; ● at night.
20----Frequent ●, especially in the morning, with somewhat gusty SWly winds; ⊤ NW 9.20 a.
21----Rainy and squally weather.
22----Rainy weather, with gusty Wly winds in the early morning.
23----● in the early morning; ○ in the morning.
24----● in the evening.
25----Gusty SWly winds at intervals with rain in the early morning and at night.
26----As yesterday.
27----Do.
28----Do.
29----Gusty SWly winds at intervals with ● in the morning.
30----Somewhat rainy and squally weather, with some ⊤ at 11.30 a.
31----Gusty SWly winds at intervals with d in the morning, ●, ☈° in the afternoon, and ●^{2} at night.

DAILY GENERAL REMARKS.

1----Rainy weather with gusty SWly winds in the afternoon; ⊤ N 8.25 a.

2----Very rainy weather with some ☈.

3----Rainy weather with some ☈ in the early morning and gusty Wly winds in the afternoon.

4----Rainy weather.

5----Somewhat rainy weather, with ⊤ in the afternoon.

6----Gusty SWly winds at intervals with some ●.

7----● in the early morning; gusty SWly winds in the afternoon; p° 1.02 p. and 7.30 p.

8----Rainy weather, with ☈° early in the morning.

9----Gusty SWly winds at intervals with some ● especially in the morning; coloration of clouds at sunset.

10----Somewhat gusty SWly winds at intervals with some ●°.

11----As yesterday.

12----● in the early morning, forenoon and afternoon.

13----● in the morning, afternoon and evening; ⊤° E in the morning.

14----Somewhat gusty SW winds in the afternoon.

15----As yesterday.

16----Somewhat gusty SWly winds in the afternoon; coloration of upper clouds at sunset.

17----≡° in the morning; somewhat gusty SW winds in the afternoon.

18----⊕^{2}, ∩ in the afternoon; coloration of clouds at sunset; ☇ NNW in the evening.

19----Cloudy weather.

20----◯°, thundershowers in the afternoon.

21----☈ NE quadrant in the afternoon; coloration of upper clouds at sunset; ☇ various points in the evening.

22----☈ various points in the afternoon and evening.

23----⌓ early in the morning; ● at night.

24----Gusty SWly winds, ⊤° SE, ○ in the afternoon; ☇ NE in the evening.

25----Thundershowers in the afternoon.

26----∩°, ●° in the morning; ☈ SW and SE quadrants in the afternoon; ☇ N in the evening.

27----d in the early morning.

28----●^{2}, with some ⊤ in the morning and afternoon; gusty SWly winds in the afternoon.

29----Rainy weather, with gusty SWly winds and ⊤° N in the forenoon.

30----● with gusty WSW winds in the early morning.

OBSERVATIONS FOR OCTOBER, 1914.

ATMOSPHERIC PRESSURE, 700mm+.

DAILY GENERAL REMARKS.

1----Cloudy weather.
2----☇ NNW, N, NE, ◡ in the evening.
3----☈ NE quadrant in the afternoon; ☇ NW, W in the evening.
4----Cloudy weather.
5----☈° ENE in the afternoon.
6----☈ E with occasional d in the afternoon.
7----☈ E, NNW with occasional ●° in the afternoon.
8----Cloudy weather.
9----⊤ E in the forenoon; ● in the afternoon; convergence of Ci. toward SSE at sunset.
10----Fair weather.
11----●° 11.40 a.; ☈ NE quadrant with occasional d, ⌒ in the afternoon.
12----☈ N quadrant in the afternoon; ☇ N in the evening.
13----Cloudy weather.
14----d° in the afternoon.
15----● 4.25 p.
16----d in the afternoon.
17----d° in the forenoon; ● in the afternoon.
18----●² in the afternoon.
19----d in the morning and afternoon.
20----Cloudy weather.
21----d° at noon.
22----☈ S with near ⊤ and occasional ● in the afternoon.
23----Cloudy weather.
24----Somewhat gusty ENE winds in the afternoon.
25----Cloudy weather.
26----As yesterday.
27----Do.
28----● 12.05 p.; ◡ in the evening.
29----Cloudy weather.
30----◡ in the evening.
31----d 2.30 p.

METEOROLOGICAL OBSERVATIONS MADE AT THE SECONDARY
STATIONS DURING THE CALENDAR YEAR 1914

MANILA
BUREAU OF PRINTING
1916

138067

INTRODUCTION.

In this volume (Part III) of the report of the Weather Bureau for 1914 we publish the meteorological observations made in the various stations which at present constitute the meteorological service of the Philippines, a service established by Act No. 131 of the Philippine Commission May 22, 1901.

In Part II of the report for 1902, pages 52 to 60, will be found a detailed account of the establishment and organization of these branch stations and a list of the instruments with which they are equipped, according to their class.

The report of the various observers are carefully collated and examined at the Central Observatory, but it is evident that the Directors cannot assume the full responsibility for the accuracy of these observations. As every meteorologist knows, in observations of this kind much must be left to the conscientious care of the observer. Hence, while we take this opportunity to express our confidence in our observers, we think it proper to subjoin the following list, which gives some particulars about the stations and also the names of the observers who are primarily responsible for the accuracy of the observations in this volume (Part III) of the Annual Report of the Weather Bureau.

REMARKS.

The hours of observations at the first and second class stations are 2 a. m., 6 a. m., 10 a. m., 2 p. m., 6 p. m., 10 p. m.; at the third and fourth class stations, 6 a. m. and 2 p. m. The time used is that of the one hundred and twentieth meridian east of Greenwich.

The barometer readings are reduced to sea level and 0° C., but no correction has been applied to eliminate the effect of gravity depending on the latitude of the place of observation.
